- 1 Market Monitor**—This section provides market rate information that is relevant to your investments. The Schwab Money Market Fund™ yield is the seven-day annualized yield.
- 2 Indices**—Indices lists are popular indicators of overall market performance and allow you to compare the performance of your portfolio to them. These are not total market return indices—they don't include reinvested dividends and distributions.

For illustrative purposes only.

1 Change in Account Value is organized by transaction type and corresponds to the underlying Transaction Detail sections. For example, the value displayed for Deposits & Withdrawals also matches the total amount in the Transaction Detail—Deposits & Withdrawals section.

2 Cash Value of Purchases & Sales and Investments Purchased/Sold offset each other in the Change in Account Value section because purchases and sales for investments have no effect on the overall account value.

3 Income Reinvested is the amount of dividends and capital gains that is reinvested. Money market dividends are automatically reinvested.

4 Change in Value of Investments reflects the change in value that is attributed to market growth or decline. It is calculated by removing the effects of deposits, withdrawals, fees, charges, transfers, and income that has been reinvested from the Change in Account Value (Ending Value minus Starting Value).

The formula is as follows:

$$\begin{aligned}
 &\text{Ending Value} \\
 &- \text{Starting Value} \\
 = &\text{Change in Account Value} \\
 &- \text{Deposits \& Withdrawals} \\
 &- \text{Dividends \& Interest} \\
 &- \text{Fees \& Charges} \\
 &- \text{Transfers} \\
 &- \text{Income Reinvested} \\
 = &\text{Change in Value of Investments}
 \end{aligned}$$
