Schwab Retirement Income Variable Annuity®
with optional living benefits.

Guaranteed income for life. In any market.

A variable annuity through Charles Schwab, issued by Pacific Life®. Guarantees are subject to the financial strength and claims-paying ability of the issuing insurance company, not Schwab, and do not apply to the separate account or the underlying portfolios available with this contract.

*Insurance products are issued by Pacific Life Insurance Company in all states except New York, and are issued in New York by Pacific Life & Annuity Company. Product availability and features may vary by state. May not be available in all states.
Now there’s a way to keep your savings invested without risking your income to market volatility.

The Schwab Retirement Income Variable Annuity®.

With the Schwab Retirement Income Variable Annuity and its optional living benefits, you can secure a retirement income stream for as long as you need it—no matter how your investments perform or how long you live.

A retirement product from names you know and trust.

**Charles Schwab**
You’ll have the straightforward guidance of a Schwab investment professional who can help incorporate an annuity into your overall retirement income plan. Plus, your annuity assets will be professionally managed by one of the top money management firms in America: Charles Schwab Investment Management, Inc.

**Pacific Life**
Your annuity and optional living and death benefits are backed by Pacific Life’s financial strength and claims-paying ability. For generations, people have relied on Pacific Life to help protect their financial security. Founded in 1868, Pacific Life maintains strong financial strength ratings from major independent rating agencies. These ratings may change and do not apply to the safety or performance of the underlying investment options. For more information and current financial strength ratings, please visit PacificLife.com.

Professional guidance to help you understand it.

When you’re considering an annuity at Schwab, we encourage you to get involved, ask tough questions, and thoroughly understand the pros and cons. A licensed Schwab investment professional will walk you through the details to help you decide whether an annuity may be right for you.

Here are some important things to keep in mind about variable annuities:

- Variable annuities offer unique benefits and features that have associated costs, but they may be particularly useful in meeting long-term savings and retirement needs.
- Variable annuities have limitations and restrictions.
- Similar to retirement plans such as IRAs and 401(k)s, withdrawals of any earnings taken before age 59½ may be subject to a 10% federal income tax penalty in addition to applicable taxes.
- Unlike retirement plans, annuity assets held outside of qualified accounts are not subject to required minimum distributions (RMDs) at age 72.
- Withdrawals will reduce your contract value and the death benefit.
- The performance of the underlying investment options is not guaranteed and will fluctuate, and an investor's units, when redeemed, may be worth more or less than the original amount invested.
- The annuity prospectus provides additional details on the annuity fees and charges, including the mortality and expense risk charge, rider fees, and any additional contract fees. Please read the prospectus and the underlying fund prospectuses carefully before investing.
### Key benefits

<td>You continue to have access to your annuity assets for emergencies or unexpected expenses.</td>
</tr>
<tr>
<td>Optional beneficiary protection</td>
<td>Protect your annuity investment for your beneficiaries with a choice of two optional death benefits, available for an additional charge.</td>
</tr>
</tbody>
</table>

### Facts to know

- Optional living benefits are riders available for an additional cost charged against the Protected Payment Base (PPB), which forms the basis for income. The PPB is not a contract value and is not available for withdrawal like a cash value. Your actual contract value will decrease with each withdrawal, though you may continue to withdraw your Protected Payment Amount for life even after the contract value has been depleted to zero. Please see the prospectus for additional details.

- Optional living benefits are subject to the financial strength and claims-paying ability of Pacific Life Insurance Company (in New York, by Pacific Life & Annuity Company).

- When you invest in a variable annuity, you do not invest directly in the portfolios. You invest in sub-accounts that, in turn, invest in the portfolios you’ve selected. Your account is then credited with variable accumulation units in that sub-account. The fees and charges associated with the sub-accounts and the terms and conditions of your investments are detailed in the prospectus and are in addition to the fees for the variable annuity and the optional living benefits.

- The base fee of the Schwab Retirement Income Variable Annuity is 0.60%, as compared to the industry average of 1.15% according to a September 2, 2020, Morningstar survey of 2,990 variable annuities. This does not include fees associated with the optional living benefits or underlying investment options. As of May 1, 2020, the underlying investment options carry additional fees and expenses of 0.57% to 0.61%, after expense reductions. The GLWB carries a fee of 0.80% (individual life) or 1.00% (joint life). Future Income Generator carries a fee of 1.35% (single life) or 1.45% (joint life). Note: The GLWB rider fee may increase up to a maximum of 1.50% for individual life and 1.75% for joint life. The Future Income Generator rider fee is guaranteed not to change once issued. However, the maximum Future Income Generator fee for newly issued contracts is 2.50% for single life and 2.75% for joint life.

- Keep in mind that withdrawals will decrease your contract value and death benefit and may also reduce the value of any optional benefits. Variable annuities are suitable for long-term goals, such as retirement, and any withdrawals of earnings may be subject to ordinary income tax and—a 10% federal tax penalty. For nonqualified contracts, an additional 3.8% tax may apply on net investment income.

- The Return of Purchase Payments Death Benefit provides beneficiaries with the contract value or the total investments, adjusted for withdrawals. The Stepped-Up Death Benefit provides the highest stepped-up value achieved on any contract anniversary prior to the annuitant’s 81st birthday. Cannot be combined with any optional living benefit. Restrictions apply, so please read the prospectus for details.
An annuity can help take the worry out of retirement income. But not all annuities are the same.

Schwab has a straightforward answer for predictable, guaranteed income.

**Powerful options that provide income for life.**
With the Schwab Retirement Income Variable Annuity, you can secure lifetime income through annuitization or by purchasing one of two living benefit riders. Both riders allow you to stay invested and provide guaranteed lifetime income that is protected in down markets.

**The Guarantee Lifetime Withdrawal Benefit (GLWB) rider** is designed to grow your income guarantee in **up markets**.
- Starting at age 65, the GLWB guarantees an annual income amount equal to 5% (4.5% for joint life) of your annuity’s highest value on any anniversary date after rider purchase.
- And you still retain the potential to grow your assets and income over time.

**The Future Income Generator (FIG) rider** is designed to grow your income guarantee in **all markets**.
- A 5% simple interest credit is added annually to your Protected Payment Base for up to 10 years or until the first withdrawal.
- Automatic resets can lock in market performance for future income, if greater than the current Protected Payment Base (including the annual credit). After a reset, future annual credits are based on the new protected payment base for the remainder of the 10 years (or until the first withdrawal).
- Starting at age 59½ FIG guarantees an annual income amount equal to 4% of the Protected Payment Base (3.5% for joint life). If you wait until age 65, the annual income amount is 4.75% (4.25% for joint life). If deferred until age 75 or older, it is 5.00% (4.50% for joint life).

**Benefits for heirs.**
With the Schwab Retirement Income Variable Annuity’s standard death benefit, your beneficiary(ies) will receive any residual value in your annuity. If protecting your beneficiary(ies) is a priority, you can purchase one of two optional death benefits for an additional fee at the time you purchase the annuity. These optional death benefits cannot, however, be combined with optional living benefits. Ask your Schwab investment professional for details. These benefits are not available in California. Subject to change.

**Are one of these right for you?**
- You want a simple way to guarantee a portion of your retirement income.
- You want the potential to grow your assets.
- You don’t want to give up your assets to get a guarantee.
- You want the freedom to make changes in the future.
You can maintain access to your assets.
When you include an optional living benefit with the Schwab Retirement Income Variable Annuity®, there’s no need to annuitize and give up access to your assets to get guaranteed income for life. You’ll enjoy these benefits:

- You can receive guaranteed income for life.
- There are no surrender charges¹.
- Any residual contract value can be passed on to your beneficiary(ies).

Three professionally managed portfolios.
To provide the broad asset class and sector diversification, Charles Schwab Investment Management, Inc. has created three sophisticated variable insurance trust portfolios.

- Each portfolio, composed primarily of exchange-traded funds (ETFs), offers broad diversification through exposure to domestic and international stocks, bonds, and cash, plus other sectors such as real estate and commodities.
- Choose among three portfolios: balanced, balanced with growth, and growth—according to your risk tolerance and investment objectives.
- You have the flexibility to switch between portfolios, tax-free, if your investment needs change over time.

Competitive, easy-to-understand pricing.
With the Schwab Retirement Income Variable Annuity, you’ll have the satisfaction of knowing that the annuity fees you pay fall well below the industry average.

Source: Industry average of 1.15%, according to a September 2, 2020 Morningstar survey of 2,990 variable annuities. The Schwab Retirement Income Variable Annuity base fee does not include fees associated with any optional benefits or the underlying investment options.

Choose from one of two optional living benefit riders

¹ For the optional GWLB rider, withdrawals in excess of the annual protected payment amount (5% for the single life rider and 4.5% for the joint life rider) or withdrawals prior to age 65 may significantly and permanently reduce the protected payment base. For Future Income Generator rider, withdrawals in excess of the annual protected payment amount or withdrawals prior to age 59½ may significantly and permanently reduce the protected payment base.

² The annual credit percentage and annual withdrawal rates are subject to change at any time. Refer to the latest rate sheet prospectus supplement at PacificLife.com for current interest credit percentage and withdrawal rate percentages.

³ For illustrative purposes only. As of May 1, 2020, the total annual operating expenses for the Schwab VIT Portfolios ranged from 0.57% to 0.61%. The investment adviser and its affiliates have agreed to limit the total annual portfolio operating expenses (excluding interest, taxes, and certain non-routine expenses) of the portfolio to 0.58% for so long as the investment adviser serves as adviser to the portfolio. This agreement is limited to the portfolio’s direct operating expenses and does not apply to acquired fund fees and expenses (AFFE). This agreement may only be amended or terminated with the approval of the portfolio’s board of trustees.

⁴ The annual charge is a percentage of the protected payment base and is deducted quarterly from the contract value. Subject to increase up to a maximum of 1.50% for individual life and 1.75% for joint life.

⁵ The annual charge is a percentage of the protected payment base and is deducted quarterly from the contract value. The fee is current as of 1/19/2021 and subject to increase up to a maximum of 2.50 for single life and 2.75% for joint life. However, once issued the rider fee will not change. Please refer to the latest rate sheet prospectus supplement at PacificLife.com for current charges.
With the Guaranteed Lifetime Withdrawal Benefit rider your income guarantee increases when markets rise.

Protected Payment Base
Your Protected Payment Base equals your initial purchase payment if added at contract issue, or the value of your annuity contract on the date you add the GLWB. It can continue to step up to the highest contract value on any subsequent contract anniversary date (the date you purchased the annuity) if higher than any previous anniversary value, but never steps back down due to market performance.

Note: The Protected Payment Base is not a contract value and is not available for withdrawal like a cash value. Your actual contract value and death benefit will decrease with each withdrawal.

Guaranteed Lifetime Income
You can decide to start income withdrawals at any time after age 65—equal to 5% of your highest Protected Payment Base for the single life rider or 4.5% for the joint life rider. Your income can even increase if your contract value rises and reaches a higher Protected Payment Base, but it won’t decrease if your contract value falls.

6 Withdrawals prior to age 59½ may be subject to a 10% federal tax penalty.
7 For the optional GWLB rider, withdrawals in excess of the annual protected payment amount (5% for the single life rider and 4.5% for the joint life rider) or withdrawals prior to age 65 may significantly and permanently reduce the protected payment base. For Future Income Generator rider, withdrawals in excess of the annual protected payment amount (4.0% for the single life rider and 3.5% for the joint life rider) or withdrawals prior to age 59½ may significantly and permanently reduce the protected payment base.
With the Future Income Generator rider your income guarantee can grow in all markets.

The first 10 years: Guaranteed growth of your retirement income

During the first 10 years, the protected payment base will increase at each contract anniversary by the greater of:
- A 5% simple-interest credit, represented by the green dots in the graph below.
- A reset if the contract value is greater than the protected payment base after a 5% simple-interest credit is applied.

If you take any withdrawals within the first 10 years, the annual credit will discontinue.

Please note that the annual credit and lifetime withdrawal percentages for newly issued contracts are subject to change; refer to the latest rate sheet prospectus supplement at PacificLife.com for current rates. The annual credit increases the amount that can be withdrawn in later years, but it is not added to your contract value.
Protected lifetime income

Starting at age 59½, you can begin taking withdrawals up to the lifetime withdrawal percentage. These withdrawals will continue for your lifetime (Single Life) or the lifetimes of both you and your spouse (Joint Life), even if the contract value goes to zero. The lifetime withdrawal percentage is based on the age the first withdrawal is taken or the age the first withdrawal is taken after a reset.

The 10th contract year marks the last annual credit. Resets may continue.

- The lifetime withdrawal percentage increases to 5.00% due to a reset occurring in a higher age range.
- Income begins at 4.75%

### Lifetime Withdrawal Percentage (% of Protected Payment Base)

<table>
<thead>
<tr>
<th>Age Range</th>
<th>Single Life</th>
<th>Joint Life</th>
</tr>
</thead>
<tbody>
<tr>
<td>59½–64</td>
<td>4.00%</td>
<td>3.50%</td>
</tr>
<tr>
<td>65–74</td>
<td>4.75%</td>
<td>4.25%</td>
</tr>
<tr>
<td>75+</td>
<td>5.00%</td>
<td>4.50%</td>
</tr>
</tbody>
</table>

### Protected Lifetime Income

Income begins at 4.75% because withdrawals began at age 72. The amount you can withdraw will increase, if a reset occurs in higher age range.

This hypothetical example is for illustrative purposes only and does not reflect a specific, actual investment. The example assumes no additional purchase payments. A reset may not apply, depending on the performance of the contract over time. This illustration is not based on any Pacific Life variable annuity.
Where could a variable annuity with an optional living benefit fit in your income plan?

Retirement income planning is like a puzzle with many pieces. How those pieces fit together for you—and whether a variable annuity with an optional living benefit is an appropriate addition—will depend on your own personal situation.

**Income for essential expenses.**
Because a variable annuity with a living benefit can provide income that is predictable and guaranteed, you may consider using it to cover the expenses that matter most—essential expenses such as basic health care, food, and housing. With essential expenses covered, you can invest other assets more traditionally in a stock-and-bond portfolio with the objective of providing money for the discretionary nice-to-haves, such as travel and hobbies.

**When a variable annuity with an optional living benefit may make the most sense.**
- You’re within 10 years of retirement.
- You believe you may live at least 20 more years once you begin making income withdrawals.
- You have sufficient savings available for unexpected expenses, reducing the likelihood that you would need to make an unexpected excess withdrawal from your annuity.
- Social Security and other predictable income are not enough to cover essential expenses.

**Get the benefit of Schwab expertise.**
A Schwab investment professional can help you create your overall retirement income plan and determine whether an annuity may be right for you.

Schwab recommends that you cover essential expenses, such as health care, food, and housing, with income from predictable sources.
A potential solution for Bill and Mary

Profile: Bill, age 63; Mary, age 62
Expected retirement age: 65
Retirement savings: $1,250,000
Anticipated annual expenses in retirement: $91,250

Here’s how the Schwab Retirement Income Variable Annuity® with an optional living benefit could be used by a couple who are retiring soon.

The income plan: The couple estimate that they will need $51,250 annually to cover essential expenses and have budgeted an additional $40,000 for travel, hobbies, entertainment, and other discretionary expenses. They would like to generate income while continuing to invest and maintain access to their assets.

Confidence to stay invested

Some investors who have guarantees in their income plan may be more likely to stay invested in the market during downturns and less likely to miss out on eventual recoveries.

Sarah M.
Age 58
Plans to retire in eight years

Phil L.
Age 67
Retired (with great genes)

Steve H.
Age 62
Needs to invest, but is fearful

With limited retirement savings, Steve feels he should stay invested but worries that market declines could reduce his future income.

Without some form of income protection, Steve may not invest as consistently or as aggressively as he should. For example, to keep up with inflation and meet income needs throughout retirement, Schwab suggests investors may want to approach retirement with a 60%/40% mix of stocks and bonds, then reduce stock exposure over time.

A variable annuity with a living benefit with a protected payment base for future income that can rise, but not fall, may help Steve stick with a more aggressive plan when he might not otherwise.

Confidence to stay invested

Some investors who have guarantees in their income plan may be more likely to stay invested in the market during downturns and less likely to miss out on eventual recoveries.
Let’s discuss how a Schwab Retirement Income Variable Annuity® might fit into your retirement plan.

Schedule a retirement consultation to get the personal, one-on-one assistance of an investment professional who can help you turn your retirement savings into retirement income³.

³The consultation is available only to clients with at least $25,000 in assets at Schwab or prospects with at least $25,000 in assets available to bring to Schwab. Individualized recommendations are available only to Schwab clients and are limited to assets held in Schwab. Information provided to prospects, or pertaining to assets held outside Schwab, as part of a consultation, are examples of the kinds of recommendations available on assets held at Schwab; these examples do not constitute recommendations, solicitations, or investment advice.
Brokerage and insurance products: Are not deposits • Are not FDIC-insured • Are not insured by any federal government agency • Are not guaranteed by the bank or any affiliate of the bank • May lose value

Variable annuities are sold by prospectus only. You can request a prospectus by calling 1-888-311-4889 (option 2) or by visiting schwab.com/annuity. Before purchasing a variable annuity, you should carefully read the prospectus and consider the annuity’s investment objectives and all risks, charges, and expenses associated with the annuity and its investment options.

A variable annuity’s value will fluctuate depending on the underlying investment. An investor’s units, when redeemed, may be worth more or less than the original amount invested. Variable annuities are suitable for long-term goals, such as retirement, and any withdrawals of earnings may be subject to ordinary income tax and—if taken prior to age 59½—a 10% federal tax penalty. For nonqualified contracts, an additional 3.8% tax may apply on net investment income. This material is not intended to be used, nor can it be used by any taxpayer, for the purpose of avoiding U.S. federal, state, or local tax penalties.

Charles Schwab & Co., Inc. is a selling broker-dealer and general insurance agency. The contract is sold by Charles Schwab & Co., Inc. (“Schwab”) through its representatives and by Schwab’s affiliated General Insurance Agencies. Charles Schwab Investment Management, Inc. (CSIM) is the adviser for the underlying investment options. Charles Schwab & Co., Inc. and Charles Schwab Investment Management, Inc. are separate but affiliated companies and subsidiaries of The Charles Schwab Corporation and are not affiliated with Pacific Life.

All individuals selling this product must be licensed insurance agents and registered representatives.

The Schwab Retirement Income Variable Annuity® is a flexible purchase payment variable deferred annuity issued by Pacific Life.

Pacific Life refers to Pacific Life Insurance Company and its affiliates, including Pacific Life & Annuity Company. Insurance products are issued by Pacific Life Insurance Company in all states except New York, and are issued in New York by Pacific Life & Annuity Company. Product availability and features may vary by state. Each insurance company is solely responsible for the financial obligations accruing under the products it issues.

In no event shall Pacific Life, its affiliates, and respective representatives be responsible for tax, accounting, legal, or investment advice. Any taxpayer should seek advice based on the taxpayer’s particular circumstances from an independent tax adviser or attorney.

Guarantees are subject to the financial strength and claims-paying ability of the issuing insurance company, and do not apply to the separate account or the underlying portfolios available with this contract. Schwab does not provide any of the insurance guarantees.

Contract Form Series: ICC12:10-1225, (state variations may apply)
